

GYNCARE Price List

Valid from 1st February 2025

Infertility Treatment		With Insurance	Self-pay
Cycle Monitoring	Consultation with a doctor, including ultrasound examination, preparation of the stimulation protocol if necessary, and ovulation induction.	€50	€50
IUI	Intrauterine insemination, including cycle monitoring, ultrasound examination, and sperm preparation using the swim-up method.	€250	€250
IUI + MSS	Intrauterine insemination, including cycle monitoring, ultrasound examination, and sperm preparation using the microfluid sperm sorting (MSS).	€450	€450
IUID	Intrauterine insemination with donor sperm, including cycle monitoring, ultrasound examination, and sperm preparation using the swim-up method.	€500	€500
IVF cycle + ET	Preparation of stimulation protocol, ultrasound monitoring during stimulation, egg retrieval under general anesthesia, sperm analysis and processing by swim-up or density gradient, insemination of the eggs, embryo culture within 48 hrs, first embryo transfer.	€0 ¹	€1,300
FET	Frozen Embryo Transfer, including preparation of stimulation protocol, ultrasound monitoring, thawing and transfer of a previously cryopreserved embryo.	€430	€430
PRP Application into the Uterine Cavity	Application of platelet-rich plasma (PRP) into the uterine cavity to support endometrium regeneration and improve embryo implantation.	€260	€260
IVF cycle without ET	Preparation of a stimulation protocol, ultrasound monitoring during stimulation, egg retrieval under general anesthesia, sperm analysis and processing by swim-up or density gradient, insemination of the eggs, and embryo culture within 48 hrs.	€0 ¹	€950
IVF natural/mild cycle + ET	Preparation of a stimulation protocol, ultrasound monitoring during stimulation, egg retrieval without anaesthesia, sperm analysis and processing by swim-up or density gradient, insemination of the eggs, embryo culture within 48 hrs, first embryotransfer.	€0 ¹	€950
IVF natural/mild cycle without ET	Preparation of a stimulation protocol, ultrasound monitoring during stimulation, egg retrieval without anaesthesia, sperm analysis and processing by swim-up or density gradient, insemination of the eggs, and embryo culture within 48 hrs.	€0 ¹	€750
IVF cycle without yield of oocytes		€0 ¹	€420
Cancellation of IVF cycle prior to ovarian puncture	Cancellation of the cycle during stimulation, prior to oocyte retrieval.	€0 ¹	€250
Comprehensive consultation services within the IVF cycle	Comprehensive consultation services within the IVF cycle in a language other than Slovak.	€300	€300

Donor Programme		With Insurance	Self-pay
DIVF BASAL	IVF Treatment with Donated Oocytes: Selection and stimulation of the donor, donor's egg retrieval under general anesthesia, sperm analysis and processing by swim-up or density gradient, fertilization by ICSI, individual embryo culture, ET. Guarantee of 6 mature oocytes, with no guarantee of blastocysts or embryo freezing.	€2,900 ¹	€4,600
DIVF OPTIMAL	Program BASAL + extended culture with TimeLapse embryo monitoring, freezing of one embryo. Guarantee of 6 mature oocytes and one blastocyst*.	€3,600 ¹	€5,300
DIVF PREMIUM	Program OPTIMAL + sperm separation method (MSS or MACS according to the embryologist's recommendation), use of the PolarAid system, the first ET with LAZH and EmbryoGlue, freezing of 2 embryos. Guarantee of 8 mature oocytes and 2 blastocysts*.	€4,600 ¹	€6,500
4 additional eggs in any DIVF	Guarantee of an additional 4 mature oocytes in any DIVF package.	€500	€500
Donor Sperm	Sperm from a donor - donor selection, thawing of donor sperm.	€250	€250
Donor Sperm Reservation	Reservation/extension of donor sperm storage for 1 year.	€120	€120
DEM	Donor Embryo Transfer, preparation of the stimulation protocol, ultrasound monitoring, frozen embryo transfer (FET) of a donor embryo at the blastocyst stage.	€1,800	€1,800
DEM + PGT-A	DEM with transfer of a genetically tested euploid donor embryo at the blastocyst stage.	€2,500	€2,500
Donor Embryo Reservation	Reservation/extension of donor embryo storage for 1 year.	€120	€120

* Blastocyst Guarantee only in case of sperm concentration at least 10 mil/ml, progressive motility over 20%, morphologically normal sperm at least 4%, sperm DNA fragmentation less than 20%, and partner age under 50 years.

¹ The price applies if the woman is under 40 years old and meets the eligibility criteria set by the health insurance company.

Cryopreservation of gametes and embryos		With Insurance	Self-pay
Social freezing	Egg freezing without medical indication: consultation, preparation of a stimulation protocol, ultrasound monitoring during stimulation, egg retrieval under general anaesthesia, freezing of eggs on 3 straws (up to 9 eggs).	€1,600	€1,600
Medical freezing	Egg freezing based on medical indication*: consultation, preparation of a stimulation protocol, ultrasound monitoring during stimulation, egg retrieval under general anaesthesia, freezing of all mature eggs, and storage for 1 year.	€0	€1,600
Thawing of eggs	Thawing of cryopreserved eggs before their fertilization.	€270	€270
Freezing of the first embryo		€200	€200
Freezing of eggs during IVF	Additional charge for the IVF cycle if the patient decides not to fertilize all eggs, 3 straws (max. 9 eggs).	€480	€480
Additional straw – eggs/ embryos	A maximum of two embryos or three eggs per straw.	€80	€80
Sperm freezing	The price does not include the necessary serological STD testing for the patient.	€200	€200
Sperm freezing as part of infertility treatment	The price does not include the necessary serological STD testing for the patient.	€100	€100
Sperm freezing for medical reasons	Freezing of sperm prior to oncology treatment, including storage for 1 year. The price does not include the necessary serological STD testing for the patient.	€0	€100
Storage in the cryobank for 1 yr	Storage or extension of storage of biological material (embryos/eggs/sperm/biopsy sample/testicular tissue) in the cryobank for each year commenced.	€150	€150
Storage in a quarantine container for 1 year	Storage or extension of storage of biological material in a quarantine container in the cryobank for each year commenced.	€200	€200
Re-vitrification of an embryo	Re-freezing of a thawed embryo.	€100	€100

Laboratory Methods		With Insurance	Self-pay
Sperm Separation Methods	Magnetically Activated Cell Sorting (MACS) or Microfluidic Sperm Sorting (MSS).	€300	€300
ICSI-3	Intracytoplasmic Sperm Injection of 1 to 3 eggs.	€300	€300
ICSI-12	Intracytoplasmic Sperm Injection of 4 to 12 eggs.	€520	€520
ICSI+	Intracytoplasmic Sperm Injection for each additional egg over 12 – additional charge.	€30	€30
IMSI	Intracytoplasmic Morphologically Selected Sperm Injection – additional charge for ICSI.	€150	€150
PICSI	Sperm selection via hyaluronan binding – additional charge for ICSI.	€150	€150
SpermMobile	Activator for immotile sperm prior to ICSI if needed.	€120	€120
Oocyte activation	After ICSI if needed.	€150	€150
Polarised Light Microscopy	Method for assessing egg maturity.	€300	€300
Individual embryo culture	Culture of embryos in a separate chamber within a multi-room incubator.	€200	€200
Extended embryo culture	Extended embryo culture beyond 48 hours, typically to the blastocyst stage.	€280	€280
Extended embryo culture with TimeLapse (EmbryoScope+)	Extended embryo culture in a specialised incubator ensuring continuous monitoring while maintaining a stable environment.	€620	€620
LAZH / LATZ	Laser-assisted zona hatching or thinning.	€210	€210
EmbryoGlue	A medium enriched with hyaluronic acid, designed to support embryo implantation.	€210	€210
LAZH / LATZ + EmbryoGlue		€320	€320

* Medical indication includes egg freezing in case of a diagnosis of breast cancer or lymphoma by an oncologist.

GYNCARE Price List

Valid from 1st February 2025

Diagnostics		With Insurance	Samoplatca
STD screening	Testing for sexually transmitted diseases (HIV, syphilis, hepatitis B and C).	€0 ²	€45
Blood collection		€0 ²	€5
Female Diagnostics			
Ovarian reserve assessment	AMH concentration test in blood and ultrasound evaluation of antral follicle count.	€0	€50
Ultrasound	Gynaecological ultrasound examination.	€0	€40
HyFoSy/HyCoSy	Ultrasound examination of fallopian tube patency.	€200	€200
uNK Test	Endometrial aspiration and analysis of uterine natural killer cells.	€220	€220
BeREADY Test	Analysis of endometrial receptivity.	€700	€700
Endometrial Biopsy	Endometrial aspiration for diagnostic purposes.	€100	€100
Postcoital Test	Assessment of sperm penetration from ejaculate into cervical mucus.	€50	€50
Male Diagnostics			
BASAL Semen Analysis	Basic semen analysis under microscope.	€25	€40
BASAL CASA Semen Analysis	Basic semen analysis using CASA (Computer-Assisted Sperm Analysis).	€40	€55
OPTIMAL Semen Analysis	Semen analysis using a CASA system + sperm DNA fragmentation testing.	€165	€180
PREMIUM Semen Analysis	Semen analysis using a CASA system + sperm DNA fragmentation testing + oxidative stress assessment in ejaculate.	€225	€245
Antisperm Antibodies Test	Testing for antisperm antibodies in the ejaculate.	€40	€40
CatSper Test	Functional assessment of sperm activation.	€70	€70
Trial-wash Test		€50	€50
Additional Consultations Options		With Insurance	Samoplatca
Comprehensive consultation services for IVF – Slovak lang.		€150	€150
IVF Consultation - Coordinator	Couple consultation with the coordinator in a language other than Slovak (at the patient's request).	€100	€100
IVF Consultation - Doctor	Couple consultation with the doctor in a language other than Slovak (at the patient's request).	€200	€200
Consultation with a Specialist	Immunological, Urological, or with a Nutritionist.	€50	€50

² Health insurance only covers serological tests for women.

GYNCARE Price List

Valid from 1st February 2025

Genetics		With Insurance	Self-pay
Initial consultation	For couples with reproductive disorders, the fee is charged once.	€0	€90
Consultation of genetic test results	Consultation of pathological results of genetic examination by a clinical geneticist with a proposal for further steps.	€0	€60
BASAL Genetic Testing Panel - Individual	Panel diagnostic analysis of genes associated with infertility treatment (genes for CF, SMA, genetic hearing loss, phenylketonuria, fragile X chromosome in women/ azoospermia factor in men, thrombophilic conditions, ANXA5, FSH and LH receptor polymorphisms, PLK4).	€450	€450
BASAL Genetic Testing Panel - Couple	Panel diagnostic analysis of genes associated with infertility treatment (genes for CF, SMA, genetic hearing loss, phenylketonuria, fragile X chromosome in women/ azoospermia factor in men, thrombophilic conditions, ANXA5, FSH and LH receptor polymorphisms, PLK4).	€850	€850
OPTIMAL Genetic Testing Panel - Individual	Carrier testing of recessive genetic mutations in 110 of the most common monogenic diseases.	€600	€600
OPTIMAL Genetic Testing Panel - Couple	Carrier testing of recessive genetic mutations in 110 of the most common monogenic diseases.	€1,100	€1,100
Cytogenetic testing	Analysis of whole chromosomes or long lengths of DNA to identify large-scale changes.	€0 ⁴	€200
GenomeScreen	Whole genome sequencing.	€0 ⁴	€350
Thrombophilia Testing	Price for testing 1 mutation out of 4 (mutations: FV Leiden, FII Prothrombin, MTHFR C677T, MTHFR A1298C).	€0 ⁴	€40
CFTR gene testing	Panel carrier testing for cystic fibrosis (64 most common mutations).	€0 ⁴	€390
FMR1 gene testing	Carrier testing for Fragile X syndrome.	€0 ⁴	€450
AZF Test (AZFa, AZFb, AZFc)	Detection of microdeletions on the Y chromosome in male infertility factor.	€0 ⁴	€160
Testing of FSHR and FSHB polymorphisms	Detection of single nucleotide polymorphisms in the gene for the FSH receptor and its β-subunit of FSH (rs6165, rs6166, rs1394205, rs10835638).	€165	€165
Testing of the ANXA5 gene	Genetic analysis of haplotypes in the ANXA5 gene.	€100	€100
MLPA SMA	Carrier testing for spinal muscular atrophy.	€0 ⁴	€190
Preimplantation Genetic Testing			
Biopsy of up to 5 embryos	Collection of trophectoderm cells for preimplantation genetic testing of 1 to 5 embryos.	€400	€400
Biopsy of an additional embryo	For each embryo over 5.	€50	€50
PGT-A + PGT-SR (per embryo)	Analysis of chromosome number and unbalanced chromosomal translocations in a single embryo.	€350	€350
PGT-M - karyomapping	Analysis of reference samples and preparation for monogenic disease testing of embryos using karyomapping.	€1,650	€1,650
PGT-M - OneGenePGT	Analysis of reference samples and preparation for testing of selected monogenic diseases in embryos using the OneGenePGT method.	€1,200	€1,200
PGT-M (per embryo)	Testing for monogenic diseases in a single embryo.	€400	€400
PGT-M - Direct Mutation Detection	Surcharge for direct mutation detection using the karyomapping method, in cases where obtaining a reference sample is not possible.	€600	€600

⁴ The price applies if the indication criteria are met.

GYNCARE Price List

Valid from 1st February 2025

Prenatal Genetic Screening Tests				
TRISOMY test	Down syndrome (trisomy 21), Edwards syndrome (trisomy 18), Patau syndrome (trisomy 13), and probable fetal sex.	€350		€350
TRISOMY test XY	TRISOMY test + screening for aneuploidy of sex chromosomes X and Y.	€390		€390
TRISOMY test +	TRISOMY test XY + screening for selected chromosomal deletions.	€450		€450
TRISOMY test Complete	Screening of all 23 pairs of fetal chromosomes.	€530		€530
TRISOMY test Complete + CF	Screening of all 23 pairs of fetal chromosomes + detection of the most common mutation causing cystic fibrosis.	€590		€590
TRISOMY test Complete + SLOS	Screening of all 23 pairs of fetal chromosomes + detection of the most common mutations causing Smith-Lemli-Opitz syndrome.	€635		€635
TRISOMY test Complete + CF + SLOS		€695		€695
RhD - NIPT	Genetic testing of the fetal Rh factor from the mother's blood.	€0 ⁴		€140

Gynaecological Clinic		With Insurance	Self-pay
Consultation	Repeated consultation or second opinion.	€80	€80
Gynaecologica examination	At the patient's request.	€30	€30
Insertion of IUD	Insertion of an intrauterine device.	€30	€30
Cervical cytology smear – slide		€0	€20
Cervical cytology smear – LBC	Liquid base cytology.	€25 (35) ³	€45

Day Surgery		With Insurance	Self-pay
Complex Service Bundle	Online booking, premium room, email delivery of results, and telephone consultation of results with a doctor.	€80	€80
Anaesthesia for procedures up to 30 minutes		€0	€75
Anaesthesia for procedures over 30 minutes		€0	€150

Female				
Hysteroscopy	Diagnostic/Operative.	€0		€400
Hysteroscopic	Resection uterine fibroids.	€0 (200) ³		€600
Cyst Aspiration	Aspiration of an ovarian cyst under ultrasound guidance.	€0 (200) ⁵		€200
Cervical Conization		€0		€440
Removal of Cervical Polyp		€0		€400
Curettage of the Uterine Cavity		€0		€400
Uterine Cavity Revision	After a spontaneous abortion.	€0		€400
Genetic testing of a miscarried fetus		€0		€450
Excision of the Vulva or Vagina		€0		€400
Application of ACRS/PRP into the Ovaries	Including general anaesthesia.	€550		€550

Male				
MESA/TESE	Microsurgical sperm retrieval from the testicle or epididymis.	€500		€500

³ The price shown in parentheses apply for Dôvera insurance policyholders.

⁴ The price applies if the indication criteria are met.

⁵ The price shown in parentheses apply for VŠZP insurance policyholders.

GYNCARE Price List

Valid from 1st February 2025

Other Services		With Insurance	Self-pay
Transportation of biological material - Slovakia	Administrative fee for preparing the documentation for the transportation of biological material from a tissue facility in Slovakia (over 30 km).	€200	€200
Transportation of biological material - EU	Administrative fee for preparing the documentation for the transportation of biological material from a tissue facility within the European Union.	€600	€600
Transportation of biological material - outside the EU	Administrative fee for preparing the documentation for the transportation of biological material from a tissue facility outside the European Union.	€900	€900
Postage Abroad	Recorded delivery.	€20	€20

Discounts for UNION Health Insurance Policyholders

€100 for PREMIUM Semen Analysis	The contribution can be used only once.
€200 for ICSI	Upon meeting the indication criteria.
€900 for PGT of embryos	Including biopsy. Applicable only if the test is indicated by a geneticist.

Prices of the respective procedures indicated in the price list are final.

The cost of donor programs does not include the expenses for the recipient's medication or the examinations of the couple recommended by the doctor, whether performed at the GYNCARE clinic or elsewhere.

Payment for the use of donor sperm for the fertilization of the recipient's oocytes, or for insemination with donor sperm, must be made on the day of the procedure, before it is carried out.

A deposit of €2,500 for IVF treatment with donor oocytes is required to be paid at the time of donor reservation.

The full price for the selected treatment will be credited to the GYNCARE's account no later than the day of oocyte retrieval from the donor.

Payment for treatment with donor embryos must be made no later than the day before the transfer of the donor embryo.
